

**Yamaha XT600E
Part No. NU 2275 KIT**

WARNING – BOTH MAIN FILTER & PRE-CLEANER MUST BE OILED PRIOR TO USE.

FITTING INSTRUCTIONS

1. Pre-Cleaner

The pre-cleaner unit replaces the snorkel unit located on top of the air box under the seat and is designed as a pre-cleaner only. That is, it has been designed to remove large particles only and thus allow the main filter to work for longer periods between servicing.

2. Main Filter

The main filter is fitted with the location tab on the filter cage pointed inward into the air filter box. Location sealing pressure is therefore applied to the "U" channel plastic on the other end of the filter cage by the air box outer cover.

SERVICING & RE-OILING

Wash the filter in **mineral turps**, pad dry with a soft, absorbent cloth and re-oil. Conventional filter oils such as Unifilter's "*Filter Fix*" or Belray are recommended.
