UNI FILTER – Air filters that work!

About Unifilter Australia

Unifilter Australia is a totally Australian-owned and family run company which started as an importer of the USA-manufactured **UNI Filter** brand in 1976. By 1988, the company had ceased importing and the *Unifilter* product had become a totally Australian-made brand using only Australian-made raw materials to produce what is now Australia's, and one of the world's, largest ranges of automotive, 4x4, ATV and motorcycle air filters.

During 2003, Unifilter also acquired the *Finer Filter* and *O₂Rush* brands with the object of expanding its already strong export market. These two brands are now manufactured specifically for export. Whilst the *Unifilter*, *Finer Filter* and *O₂Rush* brand names are all well known in the automotive market place, our manufacturing also extends to original equipment filters for Ford Motor Company, Holden, Yamaha, Suzuki and Stihl, as well as after-market production for Redline brand in Australia and Pass Filter in Japan.

Unifilter Australia employs 20 people in its Central Coast factory supplying, on average, in excess of 13,000 filters per month and growing all the time.

About Finer Filter Products

As of 1st October, 2006, Finer Filter products will be restricted to export markets only and therefore will no longer be supplied within Australia. However, customer's who already own Finer Filter products will still be able to obtain replacement foams, strippers, or foam sets if required. Contact Unifilter for details.

How Our Air Filters Work

To duplicate the world's best air filter - the human nose - Unifilter uses open cell, polyurethane foam to achieve the high level of efficiency required by today's high quality engineered engines.

The open cell polyurethane foam provides excellent air flow and - combined with foam filter treatment - the best filtration obtainable in any automotive air filter. Add to this the fully-reusable factor of polyurethane foam and you have the best air filter money can buy. You can find more technical detail on our product and technologies at www.unifilter.com.au

FILTER TYPE	AIR FLOW	DUST RETENTION	REUSABLE	AUST MADE
Paper	As a base rating	30 µm	No	Some
Oiled Paper	2% more restrictive	18 µm	No	Some
Cotton Gauze*	25% less restrictive	45 µm	Yes	No
Unifilter Foam	24% less restrictive	4 µm	Yes	Yes

NOTE - The world's leading manufacturer of cotton gauze filters recommends **oiled foam outers when used in dusty conditions.*

Our Capabilities

In addition to its automotive air filters, Unifilter also manufactures a full range of foam air filters for motorcycles, ATV's, heavy vehicles, construction, mining and agricultural machinery, etc – in fact, anything powered by an internal combustion engine. Contact Unifilter direct to discuss your particular requirements.

Unifilter also applies its design and manufacturing expertise to the wider commercial and industrial markets in the production of a diverse range of air filtration solutions where particulate retention to very low micron levels is of paramount importance. Couple this with the reusability and cost-effectiveness of its foam filter technology and it's not surprising that more and more users are finding Unifilter air filtration solutions the best decision they can make. Unifilter can design a solution for you too – contact us today to discuss your needs.

UNI FILTER Replacement 4x4, Car & Light Commercial Air Filters & Combo Packs

Selected Unifilter models are also available in convenient and economical **Combo Packs**. Packs include replacement Unifilter oiled-foam air filter plus everything required to perform regular maintenance either at home or "out on the track". Packs comprise:

- 5L storage/cleaning bucket
- Unifilter replacement oiled foam filter (pre-oiled)
- Spare second/outer stage foam (pre-oiled)
- 250ml bottle "Filter Fix" filter oil
- 250ml bottle "Foam Air Filter Cleaner"
- Protective gloves and cloth
- Instructions

For the retail customer, these packs represent around a \$20-\$25 saving compared to purchasing items separately.

Note - due to size limitations of some filters, some Combo Packs supplied in 2 parts.

† Unifilter outer cover is designed to enhance dust retention and is therefore highly recommended for use on all but sealed roads

UNI FILTER – Snorkel Pre Cleaners

“Droopie”

- Removes 90% of dust before it reaches the main filter
- Does not affect engine airflow
- Fully serviceable
- Essential “in convoy”
- Supplied pre-oiled as a 3-pack for extended trips
- Sizes available to suit most snorkels (genuine & aftermarket)

Ram Head Cover

- Quick fit/clean as required
- Great “locust-barrier” protection
- Supplied pre-oiled & ready to go

Unifilter Part No.	Snorkel O.D.	Snorkel I.D.	Application	Price Group
Preclean 3 Small	76mm	66mm	Most common size – suits Safari, Airflow & most Toyota genuine	19
Preclean 3 Large	90mm	79mm	Suits larger Safari, some TJM and some Toyota genuine	19
Preclean 3 TJM	88mm	76mm	Suits most TJM, Airtec & Nissan genuine	19
Preclean 43			Ram Head Cover	7

UNI FILTER – Airbox Pre Cleaner

- Use when no snorkel fitted to vehicle
- Suitable for standard air box with round intake entries
- Supplied as a 2-pack, pre-oiled and ready to go

Unifilter Part No	Airbox Intake Size	Price Group

UNI FILTER – Universal Rampod Kits

- Rampod kits for general and custom user applications
- 5 intake sizes available - 57mm, 63mm, 70mm, 80mm & 90mm ('xx')

Standard kit
Includes Rampod & universal fitting kit
Part No: RAMPOD xx
Price Group: 43

Standard kit with joining hose
Includes Rampod, universal fitting kit & joining hose.
Part No: RAMPOD xx-X
Price Group: 44

Plain Rampod kit
Supplied without fitting kit
Part No: RAMPOD xx-P
Price Group: 35

Plain Rampod kit with joining hose
Supplied without fitting kit but with joining hose
Part No: RAMPOD xx-PX etc
Price Group: 36

Note: Insert required intake size in Part No. to replace 'xx'. Example – Plain Rampod Kit for 70mm intake = Part No. RAMPOD 70-P

- **More power**
- **More torque**
- **Improved fuel economy**
- **Fully reusable**
- **Kits supplied with necessary fitting hardware, i.e. brackets, mounts, joining hoses and temperature sensor facilities as required.**

UBH03	1 Litre	7
UBH05	5 Litre	22

Foam Filter Cleaner

Part No	Size	Price Group
FFCLEAN 1	1 Litre	7
FFCLEAN 5	5 Litre	22

Foam Filter Servicing

Always read the full service instructions supplied with each filter

WARNING - Do not use (soapy) water or any other fluids, other than those recommended, to clean filter foams. Ignoring this warning may result in damage to the filter foam integrity and lead to reduced engine protection.

Use only the recommended brand of oil to re-oil filter foams. This oil is specially formulated for application in foam air filters. Use of other oils may again result in possible damage to the filter foam and reduced engine protection.

The Basics

- Inspect filter every 5,000kms (1,500kms in harsh conditions) at which time the filter should be rotated within the air box to expose a clean surface area to the point of air entry. Flat panel filters should be rotated end-for-end.
- Check that filter is not drying out
- Service filter every 20,000kms in normal conditions (every 5,000kms in harsh conditions).

Conventional circular and oval filters

Cleaning

Use either of the following two methods:

- Using **mineral turps only** (the only safe solvent cleaner), wash out filter foam/s, pad dry and re-oil, or;
- Using Unifilter "Foam Filter Cleaner" apply neat to foam/s and work through thoroughly. Rinse out at least 2 or 3 times in clean water to ensure all cleaning fluid has been thoroughly removed. Pad dry and re-oil.

Re-Oiling

- Use Unifilter "Filter Fix" oil treatment. Warm oil is preferable.
- Pour *Filter Fix* into a suitable container and work treatment thoroughly into foams. Squeeze out foams until only a minimal amount of treatment remains. It should only be possible to produce oil treatment on your fingers by pinching the foam. You cannot remove too much oil when using this method. **Never over oil/treat.**

Filters with "UF" prefix

Cleaning & Re-Oiling

- Wash using mineral turps only. As this style of filter is totally bonded, the most satisfactory method is to use a turps-soaked cloth and wipe dust from the filter surface. Service every 10,000 km or 5,000 in dusty conditions.
- Mix Unifilter *Filter Fix* treatment oil & mineral turps at a 50/50 ratio. Smear mix onto all foam surfaces then pad excess until foam is moist but not wet. In dusty conditions, smear neat *Filter Fix* on sealing edges to enhance sealing.

Filters with "TT" prefix

Cleaning & Re-Oiling

- Remove both layers of foam from metal frame & wash with mineral turps.
- Using 2 caps of *Filter Fix* work oil into both layers of foam by folding & squeezing foams until foams are moist but not wet. Refit foams to metal case with coarse grade foam to fresh air side.

RAMPOD Foams

- Wash & re-oil per instructions for conventional filters but reduce service interval to every 10,000 km.

Warranty

Unifilter Australia warrants that the filter element supplied is free from defects in workmanship and material. Unless subject to abuse, neglect, incorrect fitment or other circumstances beyond the control of Unifilter Australia, then the filter element will be replaced without cost for a period of three (3) years from the date of purchase.
