UNI FILTER
HIGH PERFORMANCE AIR FILTERS
RUSH

Why Unifilter dirt bike filters are the best!

PROCOMP2

2 stage MX & Enduro filter

- * Two individual filters in one (no bonding of layers = no loss of air flow)
- * Both layers are made from fine foam for improved filtration.
- * Layers can be separated for easy cleaning.
- * Flexible glue lines. Will not become brittle and crack.
- * Ultra-soft seal for improved cage sealing.
- * Designed, made & tested in Australia for Australian conditions!

Australia's best rely on Unifilter

HIGH PERFORMANCE AIR FILTERS
RUSH

Single stage MX & SX Race filter

- * Hi Flow single stage race filter.
- * Made for Unifilter's unique corrugated foam (Largest surface area filter available).
- * Flexible glue lines. Will not become brittle and crack.
- * Made from premium quality gas reticulated foam.
- * Ultra-soft seal for improved cage sealing.
- * Designed, made & tested in Australia with input from Australia's leading race teams!
- * Available in 5 awesome colours.

Other brands! Bonded twin layer filters!

- * Bonded coarse outer, fine inner layers (the bonding process reduces air flow)
- * Hard to clean properly. Dirt gets trapped between layers.
- * Hard glue lines. they become brittle and crack.
- * Most brands are made from cheap poor quality caustic reticulated foam. (if this foam gets wet the caustic reactivates and the filter can fall apart.)
- * Imported products.
